SLINGS - NATURAL ROPE, SYNTHETIC ROPE AND SYNTHETIC WEB SELF INSPECTION CHECKLIST

Guidelines: This checklist covers part of the regulations issued by the U.S. Department of Labor - OSHA under the General Industry standards 29 CFR 1910.184 and the Construction standards 1926.251. All of these regulations were adopted by reference. It applies to slings used in conjunction with other material handling equipment to move material by lifting or hoisting. Definitions are provided at the end of the checklist to help you understand some of the questions. Questions marked with the symbol (☞) may require the help of an outside expert.

Numerous tables are included as part of 29 CFR 1910.184 which relates sling configuration, sling construction, sling diameter and maximum load capacity. These tables have not be included as part of this checklist. For additional information, consult the OSHA regulations.
